

9. Please describe the nature of your work at the PATH Intl. center or describe your career plan after completing your EAAT coursework.

I am going to finish my work with the center by conducting therapeutic driving lessons for wounded vets this summer.

10. What are your goals in the field of equine assisted activities and therapies?

I would like to teach therapeutic driving to potential instructors as PATH Intl moves away from training and concentrates on certifying. I will continue as a Lead Driving Evaluator. I will continue leading the driving subcommittee through next year.

11. How do you think attending the PATH Intl. National Conference and Annual Meeting will help you in your work and goals in the field of equine assisted activities and therapies?

I am conducting a CC preconference session on driving and giving a regular session talk on making driving center affordable. These experiences at conference should help me pin point peoples needs for information and resources.
